

Nanomi strengthens its drug delivery business

Nanomi, the Dutch company bringing the precision of semiconductor technology to the manufacturing of micro and nanospheres for the life sciences, is pleased to announce the appointments of **Ms. Debra Bingham** of Valeo Partners as Nanomi's US representative and **Dr. Henrik Luessen** of Tytonis as member of the strategic advisory board.

Valeo Partners, with its extensive strategy and business development expertise in the pharmaceutical and drug delivery markets strengthen and expand Nanomi's business relationships and technology partnerships in the US. Tytonis and its professionals bring Nanomi deep technical and business expertise that will positively impact the direction of Nanomi as it expands into the pharmaceutical industry.

"These appointments bring the needed business expertise and industry contacts to the company" stated Gert Veldhuis, PhD, managing director of Nanomi. "We look forward to productive partnerships with Valeo and Tytonis as Nanomi expands and grows."

About Nanomi

Nanomi is an independent, privately owned Dutch high-tech company, which partners with companies in the life sciences to provide them with novel, high added value, micro and nanospheres enabled by its microsieve™ based process technology. The company was founded in 2004, as an independent spin-off from the University of Twente, and is located in the East of the Netherlands. Nanomi is profitable and has successfully entered into business agreements for the development of products for several top multinational companies.

Nanomi's core technology is its proprietary microsieve™ emulsification process. The microsieves™ are made by precise semiconductor technology, which enables the production of highly monodisperse droplets and particles in a robust, reproducible and cost effective way. Nanomi targets business-to-business partnerships with companies in drug delivery, molecular imaging, diagnostics, and research and analysis that have a high value product/application that strongly benefits from the technology and does not distribute and market products on its own.

About Valeo

Valeo Partners, a DC-based consultancy, focuses on providing strategic solutions to organizations operating in the pharmaceutical, drug delivery and specialty pharmaceutical markets. Valeo provides portfolio strategy, licensing and M&A services. Our partners have over three decades of combined consulting experience helping leading industry organizations achieve results.

About Tytonis

Tytonis is an international operating consultancy firm that supports entrepreneurial life sciences businesses providing advice in business development, licensing, strategic support, pharmaceutical development, portfolio strategy and valuations.
